

JOIN OUR RESEARCH EXCELLENCE

PROGRAMMES
MSc & PhD

Postgraduate Research Opportunities

Institute of Systems Biology (INBIOSIS), UKM

Dr. Goh Lab

Plant Functional Genomics | Synthetic Biology | Bioinformatics

Primary Research Themes

NGS
TRANSCRIPTOMICS

CRISPR
GENE EDITING

ML/DB
BIOINFORMATICS

Omics
PROFILING

Synthetic Biology & Microbial Bioengineering

*Engineering probiotic yeast (*S. boulardii*) for human health & therapeutics.*

Plant Multi-Omics & Secondary Metabolism

Exploring tropical species like pitcher plants & mangosteen through multi-omics.

Plant Stress Physiology & Functional Genomics

Enhancing crop resilience and understanding regulatory networks in tropical crops.

Bioinformatics & Network Biology

Omics data integration, genome-scale modelling, and gene network analysis.

Why Join Us?

- ✓ Access to **world-class facility**
- ✓ Training in cutting-edge **omics technology**
- ✓ Opportunity for high-impact **publications**
- ✓ Collaborative, supportive & interdisciplinary research environment solving global challenges

Eligibility

Open to excellent candidates with a Bachelor's (CGPA>3.50) or Master's degree in **Biology, Biotechnology, Bioinformatics, Biochemistry**, or related fields. International students (CEFR≥B2) are welcome to apply.

APPLY NOW

Intakes are throughout the year

PRINCIPAL INVESTIGATOR

Dr. Goh Hoe Han

Associate Professor, INBIOSIS UKM
